

UEE Enterprise Specification v3.0 - Enterprise Blueprint

UEE ENTERPRISE SPECIFICATION v3.0

SECTION 1 - EXECUTIVE VISION

UEE is an AI-Native Enterprise Operating System that continuously evolves strategy, capabilities, products, architecture, data, technology, governance, and value realization.

SECTION 2 - ENTERPRISE OPERATING MODEL

Domains:

- Strategy Management
- Portfolio Management
- Product Management
- Enterprise Architecture
- Data & AI
- Technology Platforms
- Governance, Risk & Compliance
- Value Realization

SECTION 3 - CAPABILITY MAP

L1 Capabilities:

- Strategy
- Business
- Product
- Data
- Application
- Technology
- Security
- Governance
- Learning
- Innovation

SECTION 4 - VALUE STREAM ARCHITECTURE

Sense → Decide → Fund → Design → Build → Deploy → Operate → Measure → Learn → Evolve

SECTION 5 - ENTERPRISE ONTOLOGY

Core Entities:

Strategy

Objective

Outcome

Capability

Value Stream

Initiative

Program

Product

Feature

Application

API

Data Product

Technology

Risk

Control

Policy

Metric

Team

Agent

SECTION 6 - KNOWLEDGE GRAPH MODEL

Strategy -> Objective

Objective -> Capability

Capability -> Product

Product -> Application

Application -> API

API -> Data Product

Data Product -> Outcome

SECTION 7 - DIGITAL TWIN ARCHITECTURE

Enterprise Twin

Portfolio Twin

Capability Twin

Product Twin

Technology Twin

Organization Twin

SECTION 8 - AGENT SOCIETY

Executive Copilot

Strategy Agent

Portfolio Agent

Product Agent

Architecture Agent

Data Agent

Security Agent

Risk Agent

Governance Agent

FinOps Agent

Learning Agent

Evolution Agent

SECTION 9 - MULTI-AGENT WORKFLOW

Executive Request

→ Planner Agent

→ Domain Agents

→ Knowledge Graph

→ Synthesis Agent

→ Executive Recommendation

SECTION 10 - AI ARCHITECTURE

LLM Layer:

Anthropic Claude

Orchestration:

LangGraph

Memory:

Vector Store

Knowledge Graph

Reasoning:

Planning

Reflection

Critique

Consensus

SECTION 11 - REFERENCE TECHNOLOGY STACK

Frontend:

Next.js

React

TypeScript

Tailwind

Backend:

Node.js

Python

Data:

PostgreSQL

Neo4j

pgvector

Infrastructure:

Vercel

Kubernetes

AWS/Azure/GCP

SECTION 12 - EVENT DRIVEN ARCHITECTURE

Events:

Strategy Changed

Capability Updated

Product Released

Risk Identified

Metric Changed

SECTION 13 - API DOMAINS

Strategy API

Portfolio API

Product API

Architecture API

Knowledge Graph API

Agent API

Governance API

SECTION 14 - SECURITY ARCHITECTURE

Zero Trust

RBAC

ABAC

Encryption

Secrets Management

Audit Logging

AI Governance

SECTION 15 - OBSERVABILITY

Metrics

Logs

Traces

Business KPIs

Agent KPIs

SECTION 16 - VALUE REALIZATION FRAMEWORK

Revenue Growth

Cost Reduction

Risk Reduction

Productivity

Innovation

Customer Outcomes

SECTION 17 - IMPLEMENTATION ROADMAP

Wave 1 Foundation

Wave 2 MVP

Wave 3 Pilot

Wave 4 Scale

Wave 5 Enterprise Rollout

Wave 6 Autonomous Evolution

SECTION 18 - PRODUCT BACKLOG

Epics:

Executive Copilot

Knowledge Graph

Traceability Explorer

Agent Studio

Learning Academy

Value Dashboard

SECTION 19 - LEARNING ACADEMY

Strategy Academy

Architecture Academy

Product Academy

Data Academy

AI Academy

Leadership Academy

SECTION 20 - MATURITY MODEL

Level 1 Initial

Level 2 Managed

Level 3 Defined

Level 4 Measured

Level 5 Autonomous Evolution

SECTION 21 - DELIVERABLES

BRD

PRD

ConOps

Operating Model

Capability Model

Ontology

Knowledge Graph

Reference Architecture

Agent Specifications

Roadmap

Cost Model

KPI Framework

SECTION 22 - NORTH STAR

A continuously learning enterprise capable of autonomous adaptation, innovation, and measurable value creation.

FINAL QUESTION

What is the next better version of the enterprise and what must evolve to achieve it?
