

UEE Enterprise Specification v7.0 - Enterprise Operating System Blueprint

UEE ENTERPRISE SPECIFICATION v7.0

1. ENTERPRISE OPERATING SYSTEM VISION

UEE becomes a complete Enterprise Operating System (EOS) that connects strategy, execution, architecture, products, data, AI, governance, finance, risk, and learning.

2. CORE PLATFORM DOMAINS

- Strategy Office
- Portfolio Office
- Product Office
- Enterprise Architecture Office
- Data & AI Office
- Technology Office
- Governance Office
- FinOps Office
- Learning Academy

3. ENTERPRISE ONTOLOGY (L1)

Entities:

Strategy, Goal, Objective, Outcome, KPI, OKR,
Capability, Value Stream, Process, Initiative,
Program, Portfolio, Product, Feature, Service,
Application, API, Data Product, Technology,
Risk, Control, Policy, Regulation, Team, Role,
Agent, Knowledge Asset, Learning Asset.

4. CANONICAL DATA MODEL

Master Domains:

Organization

Customer

Product

Capability

Technology

Data

Risk

Finance

Work

5. KNOWLEDGE GRAPH FABRIC

Neo4j Enterprise Graph

Ontology Registry

Metadata Repository

Digital Thread

Enterprise Digital Twin

6. DIGITAL TWIN ARCHITECTURE

- Enterprise Twin

- Portfolio Twin

- Capability Twin

- Product Twin

- Application Twin

- Technology Twin

- Organization Twin

7. AGENT SOCIETY

Executive Copilot

Chief Strategy Agent

Chief Product Agent

Chief Architecture Agent

Chief Data Agent

Chief AI Agent

Chief Risk Agent

Chief Governance Agent

Chief Learning Agent

Evolution Agent

8. AGENT COMMUNICATION PROTOCOL

Planner Agent

- Specialist Agents

- Knowledge Graph

- Consensus Engine

- Executive Response

9. ANTHROPIC AI PLATFORM

Claude Models

Prompt Library

Evaluation Framework

Safety Guardrails

Memory Management

10. LANGGRAPH ORCHESTRATION

Planning Graphs

Execution Graphs

Reflection Graphs

Consensus Graphs

Learning Graphs

11. DESIGN SYSTEM

React Design System

Shadcn/UI

Executive Components

Graph Components

Agent Components

12. OPEN API PLATFORM

REST APIs

GraphQL APIs

Event APIs

Webhook APIs

13. EVENT MESH

Kafka / EventBridge

Domain Events

Integration Events

Agent Events

14. SECURITY ARCHITECTURE

Zero Trust

RBAC

ABAC

Policy Engine

Audit Framework

AI Governance Controls

15. FINOPS + AIOPS

Cost Optimization

AI Cost Tracking

Usage Analytics

Resource Optimization

16. OBSERVABILITY FABRIC

OpenTelemetry

Business Metrics

Agent Metrics

Knowledge Metrics

Value Metrics

17. IMPLEMENTATION ROADMAP

Year 1 Foundation

Year 2 Scale

Year 3 Autonomous Enterprise

18. PRODUCT BACKLOG STRUCTURE

Themes

Epics

Features

Stories

Tasks

Acceptance Criteria

19. ROI MODEL

Revenue Growth

Cost Reduction

Risk Reduction

Innovation Acceleration

Decision Velocity

20. NORTH STAR

A continuously learning, self-optimizing, AI-native Enterprise Operating System.

21. FINAL EVOLUTION QUESTION

What capabilities must evolve next to create the autonomous enterprise?
