

UEE Enterprise Specification v8.0 - Autonomous Enterprise Operating System (AEOS)

UEE ENTERPRISE SPECIFICATION v8.0

1. VISION

Transform UEE into an Autonomous Enterprise Operating System (AEOS) capable of continuously sensing, reasoning, planning, governing, executing, learning, and evolving.

2. AUTONOMOUS ENTERPRISE MODEL

Sense → Analyze → Decide → Plan → Execute → Measure → Learn → Evolve

3. ENTERPRISE KNOWLEDGE OPERATING SYSTEM (EKOS)

Components:

- Enterprise Ontology
- Knowledge Graph Fabric
- Semantic Layer
- Metadata Repository
- Digital Thread
- Digital Twin Network

4. ENTERPRISE ONTOLOGY

200-500+ entities across:

Strategy

Business

Capability

Portfolio

Product

Application

Data

Technology

Risk

Governance

Finance

Learning

AI Agents

5. KNOWLEDGE GRAPH FABRIC

Neo4j Enterprise Graph

Ontology Registry

Semantic Search

Vector Search

Traceability Engine

6. DIGITAL THREAD

Strategy → Objective → Capability → Initiative → Product → Application → Data → Outcome → Value

7. DIGITAL TWIN NETWORK

Executive Twin

Organization Twin

Enterprise Twin

Portfolio Twin

Capability Twin

Product Twin

Technology Twin

8. AUTONOMOUS AGENT SOCIETY

CEO Copilot

Strategy Agent

Portfolio Agent

Product Agent

Architecture Agent

Data Agent

Security Agent

Risk Agent

Governance Agent

FinOps Agent

Learning Agent

Evolution Agent

9. MULTI-AGENT ORCHESTRATION

Planning Engine

Consensus Engine

Execution Engine

Reflection Engine

Optimization Engine

10. ANTHROPIC AI PLATFORM

Claude Models

Prompt Registry

Evaluation Framework

Guardrails

Memory Layer

11. LANGGRAPH EXECUTION FABRIC

Planning Graphs

Governance Graphs

Portfolio Graphs

Architecture Graphs

Learning Graphs

12. AUTONOMOUS GOVERNANCE

Policy-as-Code

Architecture Governance

AI Governance

Risk Governance

Compliance Automation

13. CAPABILITY MARKETPLACE

Discover

Assess

Fund

Improve

Retire

Capabilities

14. ARCHITECTURE DECISION RECORDS (ADR)

Decision Repository

Decision Traceability

Decision Analytics

15. ENTERPRISE TRACEABILITY

Strategy Traceability

Architecture Traceability

Product Traceability

Data Traceability

Value Traceability

16. EVENT-DRIVEN ENTERPRISE

Kafka / EventBridge

Domain Events

Agent Events

Governance Events

17. OBSERVABILITY FABRIC

Business KPIs

Architecture KPIs

Agent KPIs

Value KPIs

Learning KPIs

18. ARCHITECTURE-TO-CODE ENGINE

Requirements → Design → Architecture → APIs → Code Templates

19. AUTONOMOUS KPI OPTIMIZATION

Continuous monitoring and recommendations for KPI improvement.

20. HUMAN + AI OPERATING MODEL

Humans govern.

Agents assist.

Platform learns.

Enterprise evolves.

21. ROADMAP

Year 1 Foundation

Year 2 Scale

Year 3 Autonomous Operations

Year 4 Adaptive Enterprise

Year 5 Self-Optimizing Enterprise

22. TARGET STATE

A continuously learning, self-governing, AI-native enterprise capable of autonomous adaptation and measurable value realization.
